Ask a question about this product

Description Plumbago auriculata, syn. P. capensis, is a species of flowering plant in the family Plumbaginaceae, native to South Africa.

Common name: Plumbago auriculata
Color: Pale blue
Bloom time: Flowers freely
Height: 1.00 to 3.00 feet
Difficulty level: easy to grow

Planting & Care
Both can survive in temperate climates if they are planted in a sheltered area. Arabian is a small bush with evergreen leaves. There are many other varieties of plant, of which are best suited for sub-tropical climates. Learning how to grow will add a striking visual and olfactory touch to the garden.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temprature: 5°C

Fertilizer: Apply any organic fertilizer

Care:

- Fertilize the plant in spring just before new growth appears.
- Pinch off the tips of the vines in the second year to promote branching which will fill the trellis with bushy growth.
- The vining plant is prone to spider mites, which can be combated with horticultural oil or neem oil.

Special Feature:
Commonly grown in the tropics or subtropics as a low hedge, ground cover or on fences. In St. Louis, grow in pots/containers for patios, decks or other sunny areas around the home or sink to the rim in garden areas. Houseplant.

Use
Ornamental use:

- The plant is used for ornamental purpose.
- Its generally kep indoor in living room and in terrac area.
-

Note:
Watch for whiteflies, spider mites and mealy bugs on indoor plants.
