Description

With this purchase you will get:

01

Coleus coerulescens Plant

01

3 inch Grower Round Plastic Pot (Black)

Description for Coleus coerulescens

Plant height: 3 - 6 inches (7 - 16 cm)

Plant spread: 3 - 5 inches (7 - 13 cm)

Easily grown in average, medium, well-drained soil in full sun to part shade. Tolerates wide range of soils except heavy, poorly drained ones. Prefers rich, moist soils with light to moderate shade.

Common name(s): Blue spur flower, false boldo,

Flower colours: Blue/white, pink/white, red/white

Bloom time: April to May

Max reachable height: 2 to 2.50 feet

Difficulty to grow: Easy to grow

Planting and care

Coleus has long been considered a shade plant but the best leaf color is achieved with morning sun and some degree of afternoon shade. Many varieties do well in both shade and part-sun. Some can take quite a bit of sun as long as they are not allowed to dry out.

Sunlight: Full sun to part shade

Soil: Well-drained soil

Water: Average Water Needs, Water regularly, do not overwater

Temperature: 60 degrees F

Fertilizer: Apply any organic fertilizer

Caring for Coleus coerulescens

Pinch just above a set of leaves or branching junction for the best appearance; don't leave a stub. Some gardeners leave the small flowers, but it's best to pinch them off to direct more energy into stem and foliage growth. Coleus left to flower may lose vigor as the plant puts energy into seed production.

Typical uses of Coleus coerulescens

Special features: Borders, rock gardens, cottage gardens, open shade gardens, woodland gardens or naturalized areas. Also a good selection for a hummingbird garden. Continue to water plants after bloom to enjoy the ground cover effect of the foliage. Best in large clumps or massed.

Ornamental use: The plant is used for ornamental purpose.
