With this purchase you will get:

01

Haworthia truncata Green Rose Plant

01

3 inch (8 cm) Grower Round Plastic Pot (Black)

Description for Haworthia truncata Green Rose

Plant height: 2 - 5 inches (5 - 13 cm)

Plant spread: 2 - 4 inches (5 - 11 cm)

Haworthia Green Rose is a beautiful hybrid with squat lime and marbled chartreuse leaves with semi-transparent windows, lovely frosted with shades of lime green. The rosette has a nice rose shape. Flowers are small and white, forming an inflorescence up to 12 inches (30 cm) tall.

Common name(s): Haworthia Green Rose

Flower colours: White

Bloom time: Spring-Summer.

Max reachable height: Up to 10cm.

Difficulty to grow: Easy to grow.

Planting and care

Initial care for 1-2 weeks after receiving plant at your location:

Check the moisture in the soil before watering it.
Poke your finger into the soil, if dry then apply water.
Keep the plant in indirect bright light.
Do not re-pot immediately after receiving it.

Key requirements to keep plant healthy:

Sunlight: Bright indirect light

Soil: Well-drained soil.

Water: Moderately

Temperature: 22 to 35 degrees Celsius

Fertilizer: Apply any organic fertilizer.

Caring for Haworthia truncata Green Rose

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

Sunlight

- Keep the plant in a place that receives bright indirect sunlight.
- **Soil** Protect the Haworthia plant from harsh sunlight as it can cause damage to the foliage.
- **Watering** should be well drained and fertile for growing Haworthia plant.
- Water the plant when the topsoil (1-2 inch) in pot feels dry to touch.
- Do not overwater the plant.
- **Application of Fertilizer** During summer and reduce watering in winter and rainy season.
- During the main growing season (April - August) feed the Haworthia plant with organic fertilizer once a month.
- **Re-potting** topsoil without disturbing the roots of the plant so it can uptake the nutrients and moisture easily.
- When a plant outgrows in current pot, re-pot with fresh potting soil and some fertilizer.
- Do the re-potting late evening and keep the plant in shady area for 2 to 3 days and then move the plant in its suitable climatic condition.
