Description

Description for Amaryllis Lily (Random Color)

These plants are perennial herbaceous bulbous plants. They generally have large fleshy bulbs. It is a plant with strap-shaped, glossy, green leaves and producing few large funnel-shaped flowers on a stout stalk, from March-May. Leaves appear at the end of the flowering season and die out before the winter and flower stalks will develop in the fall.

Common name(s): Amaryllis

Flower colours: Any Color

Bloom time: Spring

Max reachahle height: Up to 60 cm

Difficulty to grow:: Easy to grow

Planting and care

Planting season of bulbs is in summer or early winter. Dig a hole about three times as deep as the height of the bulb. Set the bulb in the hole, pointy end up, then cover with soil and press firmly. Space bulbs 8 to 10 inches apart. Water thoroughly after planting.

Use the potting mix for bulb plantation as
Garden soil + Compost + Perlite + Sand (2:2:1:1)
Soil + Cocopeat + vermicompost (2:1:2)

Sunlight: Full to partial sunlight

Soil: Well-drained sandy loam soil

Water: Moderately

Temperature: 20 to 35 degrees C

Fertilizer: Use any organic fertilizer.

Caring for Amaryllis Lily

- Water a plant when the soil feels dry to touch. Water thoroughly in the summer and reduce watering for the winter & rainy season.
- Try to water the plants in the morning around 8-10am.
- Avoid waterlogged soil.
- Reduce watering in the winter.
- You should remove dead, infected or damaged plant parts and throw in the garbage collector.
- You should fertilize a plant at planting time and growing season.
- Mulch the potting mix with organic material.

Typical uses of Amaryllis Lily

Special features: Attractive Flowers

Ornamental use: This plant is very suitable for planting in border, shrubbery and in a pot.
