Description

Description for Lilium LA Hybrid Calais (Light Yellow) Bulbs

These are great for forcing to bloom indoors. Flowers are mostly up-facing. Generally, it takes 90 to 100 days to bloom. Although these perennial bulbs are generally unscented, a light scent sometimes can be detected during a warm day with little or no wind.

Common name(s): LiliuM LA Hybrid Calais

Flower colours: Light Yellow

Bloom time: Early Spring, Summer

Max reachahble height: Up to 18 cm (Bulb), Up to 140 cm (Plant)

Difficulty to grow:: Easy to grow

Planting and care

It should be planted in Fall/Spring. A suitable soil proportion should be 2 parts sandy loam, 2 parts peat and 1 part sand. Garden planting depth should be 4 to 6 inches and for container planting, depth should be 2 to 4 inches. The spacing between 2 bulbs can be kept 6 to 8 inches. Lilies need to be kept moist during their growing cycle and one way of conserving water is by mulching.

Sunlight: Full sun, partial shade

Soil: Well Drained, Healthy Loam

Water: Moderate

Temperature: 13 to 24 degrees C

Fertilizer: Use any organic fertilizer.

Caring for LiliuM LA Hybrid Calais

- Protect from hot sun and hot winds.
- It prefers a cooler, more sheltered position.
- Keep soil moist but do not allow wet feet, so the soil needs to be open and well drained.
- Lilies should be fertilised at least twice during their growing cycle.
- Remove old flower heads once flowers fade to promote bulb growth.

Harvesting

Spring or summer

Typical uses of LiliuM LA Hybrid Calais

Special features: Flowers

Culinary use: NA

Ornamental use: It is an LA hybrid, so has both scent and a particularly long life as a cut flower. They are also perfect for container growing or landscape border plantings.

Medicinal use: NA
