What makes it special

This pack contains Top 5 Succulents. Succulent plants require a small space, little water, and minimum attention. They are quite extensively cultivated not only for the rare beautiful flowers but also for economic purposes. Growing in curious and unexpected forms, Succulents bear both tubular or rotate flowers. They do grow in the wild but are now also protected in conservatories and nurseries

Benefits

- Extremely ungainly, they flourish in arid conditions where no plant will survive.
- Succulent inside, their thick coats and nettles ensure predators cannot get to the sap inside, sap the plants literally collect in drops of the moisture in the air.
- They are economically useful, and their flowers are magnificent.
- Succulents are thought worthy of breeding due to their unusual shape.
- It helps them obtain food; while the thick coats help to retain moisture and vitality for many weeks.
- These are low maintenance & longer lasting desert charm, which one must have in their house.
- Succulents are prickly, and pleasing.
