Care instructions

Syngonium plant

Syngonium Plant does best in bright indirect light. It should never be subjected to direct sunlight, as that would scorch the leaves.

Keep the soil moist during the growing period. Allow the plant to dry out slightly between watering during winter.

A well-drained and slightly moist soil is best to grow Syngonium plant.

Fertilize the Syngonium plant in spring or in summer with an organic fertilizer.

Repot Syngonium plant once every two years. After it has reached the growth you want to keep the same size pot and just make a new soil

~~Sweets~~ every two years.

Do not expose your sweets to extreme temperature which may affect the texture and flavour.

Do check the expiry date on the package before consuming it.
