With this purchase you will get:

01

Anthurium (Any Color) Plant

01

5 inch (13 cm) Grower Round Plastic Pot (Black)

Description for Anthurium (Any Color)

Plant height: 7 - 11 inches (17 - 28 cm)

Plant spread: 7 - 11 inches (17 - 28 cm)

Note:

This product may not have the flowers when shipped, the plant will later bloom any colored flower.

Anthurium is a herbaceous plant known for its attractive spathes which are often considered as flowers mistakenly. The true flowers are actually contained in dense spirals on the spadix. The spadix is often elongated into a spike shape, beneath the spadix is the spathe, a type of bract which is considered as flower for its attractive color by many.

Anthurium is one of the best air purifiers cleansing air pollutants, such as benzene, trichloroethylene, xylene, and formaldehyde.

Common name(s): Tailflower, flamingo flower and laceleaf.

Flower colours: Any color

Bloom time: Year Round

Max reachable height: Up to 50 centimeter

Difficulty to grow: Medium

Planting and care

Initial care for 1-2 weeks after receiving plant at your location:

Keep the plant in Natural indirect bright Light.

Poke your finger/plain small stick into the soil to check the moisture.

Apply 3 cup (Approx. 150 ml) water when top soil (3-4 inches) feels dry to touch.

Do not re-pot for min. 2 weeks after receiving it.

Key requirements to keep plant healthy:

Sunlight: Natural indirect/artificial bright light

Soil: Well drained soil rich in organic content.

Water: Apply 3 cup (Approx. 150 ml) water when the top soil (3-4 inch) in pot feels dry to touch.

Temperature: 18 to 30 degree Celsius

Fertilizer: Organic fertilizer once a month in growing season (February to September)

Caring for Anthurium

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

Light Requirement

- Natural indirect/artificial bright light
- Do not expose the plant to direct sunlight.

Soil

- The soil should be well drained, porous, rich in organic content.

Watering

- Poke your finger/plain small stick into the soil to check the moisture.
- Apply 3 cup (Approx. 150 ml) water when the top soil (3-4 inch) in pot feels dry to touch.
- Apply water preferably in morning or evening.
- Do not overwater the plant.
- As a rule of thumb, water the plant thoroughly in the summer and reduce watering in winter and rainy season.

Application of Fertilizer

- Before the application of fertilizer loosen the topsoil without disturbing the roots of the plant so it can uptake the nutrients and moisture.
- During the main growing season (February to September) feed the plant with organic fertilizer once a month.
- Apply water immediately after application of fertilizer.

Plant Protection

- Remove dead, infected or damaged plant parts and discard them away from the plants.
- For any insect attack or disease, you can use Neem oil, Eucalyptus oil or Citrus oil spray for primary treatment.

Don'ts

- Do not over water the plant especially when pot does not have drainage holes.
- Avoid applying water on flowers and leaves it may cause fungus infection.
- Do not expose the plant to direct sunlight.
- Protect from direct AC vents or dry air.

Typical uses of Anthurium

Special features: Best indoor flowering plants.

Ornamental use: Used as cut flower and decoration of indoor spaces.
