01

Raphis Palm, Lady Palm Plant

01

6 inch (15 cm) Grower Round Plastic Pot (Black)

## Description for Raphis Palm, Lady Palm

**Plant height:** 19 - 30 inches (48 - 77 cm)

**Plant spread:** 12 - 19 inches (30 - 49 cm)

Raphis palm is one of the most popular palms of India. It has delicate heads of fan-shaped leaves. Raphis Palm grows happily in the tropical and shady areas receiving little or no sunlight. Raphis palm likes good air circulation and can look very decorative in staircase, in warm patios in summers, providing it receives little sun. Raphis palm was listed as one of the best plants for removing toxins in the air by NASA.

**Common name(s):** Raphis Palm, Lady Palm, Lady palm, Raphis Exelsa, Broadleaf Lady Palm, Needle leaf Palm,

**Flower colours:** Yellow

**Bloom time:** Spring

**Max reachable height:** 4 meters

**Difficulty to grow:** Easy to grow

## Planting and care

### Initial care for 1-2 weeks after receiving plant at your location:

Check the moisture in the soil before watering it.

Poke your finger into the soil, if dry then apply water.

Keep the plant in indirect bright light after that move it to direct sunlight.

Do not re-pot immediately after receiving it.

### Key requirements to keep plant healthy:

**Sunlight:** Partial shade

**Soil:** Well drained soil

**Water:** Moderately

**Temperature:** 16-27 degree Celsius.

**Fertilizer:** Apply any organic fertilizer

## Caring for Raphis Palm

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

### Sunlight

- Keep the plant in morning sunlight for at least 3 to 4 hours or in bright indirect light.
- **Shield** the Raphis palm from direct harsh sunlight as it can cause damage to the foliage.
- **Watering** should be well drained and fertile for growing Raphis palm.
- Water the plant when the topsoil (1-2 inch) in pot feels dry to touch.
- Do not overwater the plant.
- Water thoroughly in the summer and reduce watering in winter and rainy season.
- Raphis palm are sensitive to excess boron, fluoride, and chlorine in water supplies, which will cause fast spreading black tip burn. Use

**Application of Fertilizer** until the problem is corrected.

- During the main growing season (April - August) feed the Raphis palm with organic fertilizer once a month.
- **Planting** the topsoil without disturbing the roots of the plant so it can uptake the nutrients and moisture easily.
- **Repotting** come out from the center of the trunk. Trim off lower leaves as they age and become discolored.
- When a plant outgrows in current pot, re-pot with fresh potting soil and some fertilizer.
- Do the re-potting late evening and keep the plant in shady area for 2 to 3 days and then move the plant in its suitable climatic condition.
