## With this purchase you will get:

01

Anjeer, Common fig Plant

## Description for Anjeer, Common fig

**Plant height:** 10 - 16 inches (25 - 41 cm)

**Plant spread:** 5 - 9 inches (12 - 23 cm)

This product does not have the flowers and fruits at the time of shipping. Afterward, the plant will bloom and produce fruits. Anjeer is a beautiful small deciduous tree with an interesting spreading habit from Moraceae family. The breadth is often wider than the height of 4-9 meter.

The bark is a smooth, silvery gray. The leaves of the tree are the identifying feature, they are about 4 inches long and have 3 or 5 lobes. The species name carica means having papaya-like leaves.

The fruit, which is called anjeer, may be top-shaped, or pear-shaped, 1 to 4 in long, and varies in color from yellowish-green to coppery, bronze, or dark-purple. Well loved for their sweet, mild flavor fruit and multiple uses and fig are great source of calcium.

In Missouri, plants may be grown in sheltered locations outdoors with root mulch or in containers that are overwintered indoors. Planting is usually done in the month of January-February month.

**Common name(s):** Anjeer, Common Fig

**Flower colours:** Yellowish-green to coppery.

**Bloom time:** February-May

**Max reachable height:** Up to 9 meter

**Difficulty to grow:** Easy

## Planting and care

### Initial care for 1-2 weeks after receiving plant at your location:

- Poke your finger/plain small stick into the soil to check the moisture.
- Apply 4 cup (approx.200ml) of water when the top soil (1-2 inch) in the pot feels dry to touch.
- Keep the plant in artificial bright light.
- Do not re-pot for min. 2 weeks after receiving it.

### Key requirements to keep plant healthy:

**Sunlight:** Natural bright light with morning sunlight(more than 6 hours)

**Soil:** Well drained, fertile and rich in organic content

**Water:** Apply 4 cup(approx.200ml) of water when the top soil (1-2 inch) in the pot feels dry to touch

**Temperature:** 30-45 Degree Celsius

**Fertilizer:** Apply organic fertilizer once a month during main growing season (December-February)

## Caring for Anjeer

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

### Sunlight

- **Soil** - Requiring sunlight of more than 6 hours a day is ideal for flowering and fruit development.
- **Watering** - Soil should be well drained, fertile and rich in organic content for growing Anjeer fruit plant.
- Poke your finger/plain small stick into the soil to check the moisture.
- Apply 4 cup (approx.200ml) of water when the top soil (1-2 inch) in the pot feels dry to touch.
- Do not overwater the plant.
- As a rule of thumb, water the plants thoroughly in summer and reduce watering in winter and rainy season.
- **Application of Fertilizer** - preferably in the morning or evening.
- Before application of fertilizer loosen the topsoil without disturbing the roots of the plant so, it can uptake the nutrients and moisture easily.
- Apply organic fertilizer once a month during the main growing season (December-February)
- **Pest Protection** - Immediately after application of fertilizer.
- Remove dead, infected or damaged plant parts and discard them away from the plants.
- For any insect attack or disease, you can use Neem oil, Eucalyptus oil or Citrus oil spray for primary treatment.
- **Don'ts**
  - Do not overwater the plant specially when pot doesn't have drainage hole.
  - Avoid applying water in hot afternoon it may cause fungus infection.

## Harvesting

June

## Typical uses of Anjeer

**Special features:** Small fruit tree. The tree is hardy in nature and requires comparatively low maintenance costs

**Culinary use:** Fruits are edible

**Ornamental use:** Fig plant can be used in the garden for an ornamental purpose.

**Medicinal use:** Fig fruit is used as laxative to relieve constipation and its leaves are used for diabetes, high cholesterol and other skin conditions.

**Note:** The only way to get information is to get real guidelines, take it to a doctor or a healthcare provider for guidelines
