Greater Galangal, Blue Ginger, Thai Ginger Plant

Description for Greater Galangal, Blue Ginger, Thai Ginger

Plant height: 3 - 6 inches (7 - 16 cm)

Plant spread:

Thai Ginger grows to a height of about 5 feet, the leaves being long, rather narrow blades, and the flowers, of curious formation, growing in a simple, terminal spike, the petals white, with deep-red veining distinguishing the lip-petal. The ranced pieces of rhizome are from 3.5-7.5 cm in length, and seldom more than 2 cm thick.

Common name(s): Thai Ginger, siamese ginger, Greater Galangal

Flower colours: yellowish white

Bloom time: Late Summer

Max reachable height: 4 feet

Difficulty to grow: easy to grow

Planting and care

Sunlight: Full Sun to Partial Shade

Soil: well-drained soil

Water: medium

Temperature: -

Fertilizer: Apply any organic fertilizer

Caring for Greater Galangal

Dig a hole, then cover the rhizome with so soil. If you have excess galangal in the fridge, do not throw them away. You can grow them into exotic ginger plants with lovely foliage. If you like, you can harvest the rhizomes later for cooking.

Typical uses of Greater Galangal

Special features: Galangal is used as a tincture, a decoction or in powder form and as a medicine.

Culinary use: The rhizome is a common ingredient in Thai curries and soups, where it is used fresh in chunks or cut into thin slices, mashed and mixed into curry paste. Indonesian rendang is usually spiced with galangal.

Ornamental use: The plant is used for ornamental purpose.

Medicinal use: It is a bitter herb that is used to promote digestion and stimulate appetite and production of digestive fluids.
