Sedum Angelina (Golden) Plant

01

3 inch Grower Round Plastic Pot (Black)

## Description for Sedum Angelina (Golden)

**Plant height:** 0.5 - 0.8 inches (1 - 3 cm)

**Plant spread:** 2 - 4 inches (5 - 11 cm)

*Sedum rupestre* Angelina easily grown in average, dry to medium, well-drained soils in full sun. Tolerates some light shade. Also, tolerates drought and heat. Thrives in sandy to gravelly soils of moderate to low fertility.

Angelina is a yellow leaved cultivar featuring spiky yellow leaves that often sport ginger brown tips. Clusters of yellow starry flowers appear during the summer.

**Common name(s):** Stonecrop, Crooked Yellow Stonecrop

**Flower colours:** White to Yellow

**Bloom time:** June to August

**Max reachable height:** Up to 6 inches

**Difficulty to grow:** Easy to grow

## Planting and care

Plant sedum seeds in early spring in well-drained, average to rich soil in full sun. Space the plants between 6 inches and 2 feet apart, depending on the type. Low-growing and vigorous species will tolerate partial shade.

You can also plant divisions or cuttings instead of seeds. Dig a hole so that the top of the root ball is level with the surface, then place the plant in the hole and fill it in.

**Sunlight:** Full sun

**Soil:** Dry, Average, Well Draining

**Water:** Dry to medium

**Temperature:** 20 to 30 degrees C

**Fertilizer:** Apply any organic fertilizer

## Caring for Sedum Angelina

- Once established, sedums require little care.
- Check your plants regularly to make sure they are not dry and water when needed.
- After flowering, cut back the plants to maintain their shape.
- Remember to divide your plants in the spring or fall to control their spread.
- Throughout the summer, divisions and cuttings root readily.
- Keep away from heat or air-conditioning vents

## Harvesting

NA

## Typical uses of Sedum Angelina

**Special features:** Excellent ground cover. Border fronts or rock gardens. Best massed or in groups. Site in areas where both the foliage and flowers may be appreciated.

**Culinary use:** NA

**Ornamental use:** The leaves are the main ornamental interest of this cultivar. In temper climate, the leaves usually turn reddish-orange in fall.

**Medicinal use:** NA
