

Azalea hybrids single - Plant

In hot dry areas of India they are best kept in some shade. They may not flower as they do in the cooler regions - but keep on throwing up the occasional burst of color. Plants are easy to grow. They require acidic soils and good quality water. Clayey soils with good organic matter content do just fine. Pruning is not required. Plants need good amount of water especially in warm summer months. Do not transplant often.

Azalea hybrids single Plant

Description for Azalea hybrids single

Plant height: 3 - 6 inches (7 - 16 cm)

Plant spread:

In hot dry areas of India they are best kept in some shade. They may not flower as they do in the cooler regions - but keep on throwing up the

occasional burst of color. Plants are easy to grow. They require acidic soils and good quality water. Clayey soils with good organic matter content do just fine. Pruning is not required. Plants need good amount of water especially in warm summer months. Do not transplant often.

Common name(s): Rhododendron Delaware Valley White ,Azalea Single Flowered

Flower colours: Various colored flowers available viz., Dark Pink, Light Pink, White, Red, Orange, Pink, Salmon, Purple

Bloom time: Year-around flowering, Flowers in flushes throughout the year

Max reachable height: 1 to 2 meters

Difficulty to grow: easy to grow

Planting and care

Plants do not thrive in Zones 9 to 10 without a period of refrigeration; they need a cold, dormant period. Select a site with soil that drains well. How can you tell? After a good rain, find a spot that is the first to dry out. Water trapped beneath the scales may rot the bulb, so a well-drained site is essential.

Sunlight: best kept in some shade.

Soil: Clayey soils with good organic matter content do just fine. They require acidic soils.

Water: Plants need good amount of water especially in warm summer months.

Temperature: 50-60°F

Fertilizer: apply any organic fertilizer

Caring for Azalea hybrids single

Diligently water your plants. Soak the entire root zone at least twice a week in dry summer weather. Avoid frequent shallow sprinklings, which won't reach the deeper roots and may encourage fungus. Plants do best with 90 inches of rain per year, so unless you live in a rain forest, water regularly.

Harvesting

Year-around flowering, Flowers in flushes throughout the year
