Description Calophyllum inophyllum is a large evergreen, commonly called Alexandrian laurel balltree, beach calophyllum, beach touriga, beautyleaf, Borneo-mahogany, Indian doomba oiltree, Indian-laurel, laurelwood,

Common name: Alexandrian laurel balltree, beach calophyllum, beach touriga, beautyleaf

Color: green

Bloom time: April to may

Height: 8 to 20 m

Difficulty level: easy to grow

Planting & Care

Beauty leaf trees are only for gardeners in frost-free areas. Rated for USDA plant hardiness zones 10b and 11, they die when exposed to freezing temperatures. If you live in a climate where you can grow a beauty leaf tree, you should consider the impact the fruit has on the landscape before planting the tree.

Sunlight: Full Sun to Partial Shade

Soil: well-drained soil

Water: Medium

Temperature: 65-85°C

Fertilizer: Apply any organic fertilizer

Care:

- With showy, white flowers that bloom in summer and attractive, glossy evergreen foliage, beauty leaf trees are tropical gems that deserve their name.
- They grow slowly to a height of up to 50 feet with a lush canopy that spreads 30 to 50 feet.

- Their intense fragrance and dense shade make them highly desirable specimen trees, but as youâ€™ll see, they arenâ€™t suitable for most North American landscapes.
-

Special Feature:

Beds, border fronts, pots, containers

Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

No serious insect or disease problems.
