Description Clerodendrum is a genus of flowering plants in the family Lamiaceae. Its common names include glorybower, bagflower and bleeding-heart.

Common name: glorybower, bagflower and bleeding-heart.

Color: White, dark red

Bloom time: Seasonal bloomer

Height: 12.00 to 15.00 feet

Difficulty level: easy to grow

Planting & Care

Also, select a site that gets full sun. For dependable blooms, plants need six to eight hours of direct sunlight a day. If it's too shady, the stems will attempt to lean towards the sun or get spindly and fall over. Most of the popular varieties prefer acidic to neutral soil, but some are lime-tolerant or prefer alkaline soils.

Sunlight: Part shade

Soil: well-drained soil

Water: Medium

Temperature: 10-13Â°

Fertilizer: Apply any organic fertilizer

Care:

- Do not prune plants in the fall.
- Simply cut off any dead or diseased canes.
- Stop fertilizing 6 weeks before the first frost but continue watering during dry autumn weather to help keep plants fortified during the dry

winter.

- Mound, mulch, or add compost after a few frosts but before the ground freezes.
-

Special Feature:

Makes an excellent hanging container plant, or can be trained on a trellis.

Use

Medicinal use:

- The Hill glory bower, (*Clerodendrum infortunatum*), is a perennial shrub belonging to the family Lamiaceae, also sometimes classified under Verbenaceae.
- It is the type species among ~400 species of *Clerodendrum*.
- It is one of the most well-known natural health remedies in traditional practices and siddha medicine.

Ornamental use:

- The plant is used for ornamental purpose.

Note:

for medicinal use
