Description Winter hardy to USDA Zones 10-12 where it is grown in evenly moist, organically rich, well-drained soils in full sun to part shade. Needs a trellis, pergola or other type of support on which to grow.

**Common name:** glory bower

**Color:** Red

**Bloom time:** Seasonal bloomer

**Height:** 10.00 to 12.00 feet

**Difficulty level:** easy to grow

**Planting & Care**

Clerodendrum bleeding heart performs best in partial shade or dappled sunlight, but it may tolerate full sunlight with plenty of moisture. The plant prefers rich, fertile, well-drained soil.

**Sunlight:** Full Sun to Partial Shade

**Soil:** well-drained soil

**Water:** Medium

**Temperature:** 10 Â°C

**Fertilizer:** Apply any organic fertilizer

**Care:**

- Water the plant frequently during dry weather; the plant requires consistently moist, but not soggy soil.
- Clerodendrum bleeding heart needs frequent fertilization to supply nutrients required to produce blooms.
- Feed the plant a slow-release fertilizer every two months during the blooming season, or use a water-soluble fertilizer every month.

**Special Feature:**

Where winter hardy, excellent flowering vine for trellis, pillar or wall. Grow in containers in the St. Louis area.

Use

**Culinary use:**

- leaves

**Ornamental use:**

- The plant is used for ornamental purpose.

**Note:**

No serious insect or disease problems.
