Description Bloomed most of the late summer. Last year we had warm autumn rains and the leaves seem to rot from them putting the plant in dormancy for the winter.

Common name: Mouse Trap Tree, Burger s Onion, Succulent Sesame

Color: green

Bloom time: june

Height: 4 feet to 6 feet

Difficulty level: easy to grow

Planting & Care

Only,it never bloomed this year. I did pot it up and it has a nicely developing fat trunk and a full crown of foliage. Its outdoors 24/7 in the SF bay area s z10a. I don t have plans to plant it yet. Maybe if it becomes a few feet tall,I might risk it.

Sunlight: full sun

Soil: well-drained soil

Water: medium

Temprature: 10Â°C

Fertilizer: Apply any organic fertilizer

Care:

- I have a small one of these for over a year now and it is so easy.
- I keep it inside where it has tolerated such neglect.
- As soon as I pay it a little attention like repotting it or fertilizing, it recovers and puts out tons of new growth.

Special Feature:

I have been growing this plant in a pot in my lanai for about 3 years and it was doing very nicely, but was clearly ready to be given more space.
Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

No serious insect or disease problems.
