

Khus, Vetiver - Plant

The vetiver bunch grass has a gregarious habit and grows in tufts. Shoots growing from the underground crown make the plant frost and wildfire resistant, and allow it to survive heavy grazing pressure

Khus, Vetiver Plant

Description for Khus, Vetiver

Plant height: 15 - 23 inches (38 - 59 cm)

Plant spread: 4 - 6 inches (10 - 16 cm)

Chrysopogon zizanioides, commonly known as vetiver is a perennial bunchgrass of the Poaceae family, native to India. In western and northern India, it is popularly known as khus.

Common name(s): -

Flower colours: Olive green

Bloom time: June to August

Max reachable height: 4 to 6 feet (1.2 to 1.8 m)

Difficulty to grow: Easy to grow

Planting and care

Growing plants can be inexpensive, particularly when growing them from seed. Seeds of plants flowers should usually be sown directly into the sunny flower bed, as developing roots do not like to be disturbed.

Sunlight: Full Sun to Partial Shade

Soil: Well-drained soil

Water: Medium

Temperature: 25degrees C (77 degrees F).

Fertilizer: Apply any organic fertilizer

Caring for Khus

Place plants in full sun in average, well-drained soil. Drainage is important; dont place where roots will sit in water. Leaves develop best flavor in full sun.

Typical uses of Khus

Special features: Find Medicinal herb khus khus (Vetiver) uses and pictures. *Vetiveria zizanioides* has been harvested for 3000 years for its medicinal

Ornamental use: The plant is used for ornamental purpose.

Medicinal use: The most important chemical constituents present in the plant are benzoic acid, vetiverol, furfurole, and vetivone. It is also used

for its cooling purpose and used to flavour traditional juice or Sharbat. It is also used to make mat and hand fans.
