Litchi (Grown through seeds) Plant

Description for Litchi (Grown through seeds)

Plant height: 24 - 36 inches (60 - 92 cm)

Plant spread: 5 - 9 inches (12 - 23 cm)

The lychee, litchi, liechee, liche, lizhi or li zhi, or lichee is the sole member of the genus Litchi in the soapberry family, Sapindaceae.

Common name(s): Litchi chinensis

Flower colours: Green

Bloom time: April to May

Max reachable height: 20 to 30 feet

Difficulty to grow: Easy to grow

Planting and care

Place one lychee seed into each cup, on its side, at a depth of 3 to 4 inches; then cover. Place the trays or cups in a warm, sunny place like a windowsill, a sun room or a greenhouse. Water regularly to keep the soil damp. After 3 to 4 weeks, the shoot will grow to 3 to 4 inches in size and develop dark green leaves.

Sunlight: Full sun

Soil: Well-drained soil

Water: Medium

Temperature: 24 degrees C

Fertilizer: Apply any organic fertilizer

Caring for Litchi

Lychee trees are water lovers and should be irrigated regularly. However, avoid creating waterlogged conditions, which may result in diminished health or root rot.

Typical uses of Litchi

Special features: Commercially grown for fruit production. Excellent landscape tree which provides shade, fruit and botanical interest to front or back yards.

Ornamental use: The plant is used for ornamental purpose.
