Planting and care

Initial care for 1-2 weeks after receiving plant at your location:

- Poke your finger/plain small stick into the soil to check the moisture.
- Apply 3 cup(approx.150ml) of water when the top soil (1-2 inch) in the pot feels dry to touch.
- Keep the plant in artificial bright light.
- Do not re-pot for min. 2 weeks after receiving it.

Key requirements to keep plant healthy:

Sunlight: Natural bright light with morning sunlight(3-6 hours)

Soil: Well drained, fertile and rich in organic content

Water: Apply 3 cup(approx.150ml) of water when the top soil (1-2 inch) in the pot feels dry to touch

Temperature: 25-32 Degree Celsius

Fertilizer: Apply organic fertilizer once a month during growing season (February-March)

Caring for *Passiflora incarnata*

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

Sunlight

- **Soil** - Morning sunlight of 3 - 6 hours a day is ideal for flowering and plant grow well in bright light for rest of the day.
- **Watering** should be well drained, fertile and rich in organic content for growing Passion Flower plant.
- Poke your finger/plain small stick into the soil to check the moisture.
- Apply 3 cup(approx.150ml) of water when the top soil (1-2 inch) in the pot feels dry to touch.
- Do not overwater the plant.
- As a rule of thumb, water the plants thoroughly in summer and reduce watering in winter and rainy season.

Application of Fertilizer

- **Application of Fertilizer** preferably in the morning or evening.
- Before application of fertilizer loosen the topsoil without disturbing the roots of the plant so, it can uptake the nutrients and moisture easily.
- Apply organic fertilizer once a month during the main growing season (February-March)
- **Plant Protection** immediately after application of fertilizer.
- Remove dead, infected or damaged plant parts and discard them away from the plants.
- For any insect attack or disease, you can use Neem oil, Eucalyptus oil or Citrus oil spray for primary treatment.

Don'ts

- Do not overwater the plant specially when pot doesn't have drainage hole.
- Avoid applying water on flowers and leaves it may cause fungus infection.
