Description

With this purchase you will get:

01

Curtain creeper, Vernonia creeper, Parda bel Plant

Description for Curtain creeper, Vernonia creeper, Parda bel

Plant height: 14 - 22 inches (35 - 56 cm)

Plant spread: 3 - 5 inches (7 - 13 cm)

One of the most attractive vines, botanically known as *Tarlmounia elliptica* and belongs to the family Asteraceae. Leaves are alternate, shortly petiolate, oblong to elliptic. Vernonia creeper provides deep green cover to most of the object. The slender stems climb up and then fall down beautifully over a wall or railing and gives a live green fencing effect. The tender stems, all hanging down, form a curtain, hence the name Curtain creeper. This beautiful foliage plant, grown primarily for its habit of forming a lush green curtain on walls. This creeper is easy to grow and is commonly seen hanging over walls in cities.

Common name(s): Curtain creeper, Vernonia creeper, Parda bel

Flower colours: Yellow, orange, red, pink, white

Bloom time: February to March

Max reachable height: 1 to 1.5 meter

Difficulty to grow: Easy

Planting and care

Initial care for 1-2 weeks after receiving plant at your location:

- Keep the plant in natural indirect bright Light.
- Poke your finger/plain small stick into the soil to check the moisture.
- Apply 1 (Approx. 50 ml) water when top soil (1-2 inches) in pot feels dry to touch.
- Do not re-pot for min. 2 weeks after receiving it.

Key requirements to keep plant healthy:

Sunlight: Natural direct 3-6 hours of morning sunlight and natural indirect bright light for the rest of the day.

Soil: Soil should be well drain and fertile, rich in organic content.

Water: Apply 1 cup (Approx. 50 ml) when top soil (1-2 inches) in pot feels dry to touch.

Temperature: 25 to 30 degree Celsius

Fertilizer: Apply any organic fertilizer once a month (Jan-Feb).

Caring for Curtain creeper

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

Light Requirement

- At least 3-6 hours of preferably morning sunlight a day is ideal for plant to grow well and natural indirect bright light for the rest of the day.
- **Watering** should be well drained and fertile, rich in organic content for growing curtain creeper plant.
- Poke your finger/plain small stick into the soil to check the moisture.
- Apply 1 cup (Approx. 50 ml) water when top soil (1-2 inches) in pot feels dry to touch.
- As rule of thumb, Water the plant thoroughly in the summer and reduce watering in winter and rainy season.
- Do not over-water the plant.
- **Application of Fertilizer** morning or evening.
- Loosen the topsoil without disturbing the roots of the plant so it can uptake the nutrients and moisture easily.
- During the main growing season feed the plant with organic fertilizer once a month (Oct-Jan).
- **Repotting** immediately after application of fertilizer.
- When a plant outgrows in current pot, re-pot with fresh potting soil and some fertilizer.
- Do the re-potting late evening and keep the plant in shady area for 2 to 3 days and then move the plant in its suitable growing area.
- For re-potting procedure [click here](#)

Plant Protection

- Remove dead, infected or damaged plant parts and dispose them away from the planting area.
- Spray Neem, Eucalyptus or Citrus oil for any insect/pest attack, as a primary treatment.

Don'ts

- Do not over water the plant especially when pot does not have drainage holes.
- Avoid applying water on flowers and leaves it may cause fungus infection.

Typical uses of Curtain creeper

Special features: The varieties are used for live fencing instead of concrete or in containers or window boxes. Taller varieties in borders. Excellent in cutting gardens for both fresh cut and dried flowers.

Ornamental use: The plant is used for an ornamental purpose.
