Description Water regularly during the growing season. Best in full sun, but appreciates some light shade in the heat of the day. Best flowering occurs when nights are cool (50s-60s). Promptly deadhead spent flowering stems.

Common name: Pseudogynoxys chenopodioides

Color: Orange

Bloom time: June to October

Height: 6.00 to 12.00 feet

Difficulty level: easy to grow

Planting & Care

Plant where they will receive a minimum of 5 to 6 hours of full sun per day. Plants grown in weak sun may not die at once, but they weaken gradually. Give them plenty of organic matter when planting and don't crowd them. Wear sturdy gloves to protect your hands from prickly thorns.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 20 Â°F

Fertilizer: Apply any organic fertilizer

Care:

- Feed plants on a regular basis before and throughout the blooming cycle (avoid chemical fertilizers and pesticides if you're harvesting for the kitchen).
- Once a month between April and July, apply a balanced granular fertilizer (5-10-5 or 5-10-10).

- Allow ¼ to 1 cup for each bush, and sprinkle it around the drip line, not against the stem.

Special Feature:

Ornamental vine cultivated for its attractive flowers. Best grown on a structure such as a chain link fence, trellis, arch or upright post. Drape from hanging baskets. Where not winter hardy, it may be grown as an annual.

Use

Ornamental use:

- The plant is used for ornamental purpose.
-

Note:

No serious insect or disease problems.
