01

Portulaca, 9 O Clock (Any Color) Plant

01

5 inch (13 cm) Grower Round Plastic Pot (Black)

Description for Portulaca, 9 O Clock (Any Color)

Plant height: 0.7 - 1.2 inches (1 - 4 cm)

Plant spread: 3 - 5 inches (7 - 13 cm)

Interesting Fact: Portulaca is also known as 9 O clock plant as it blooms approximately at 9 O clock in the morning in India, making it a very interesting plant!!

This product does not have the flowers at the time of shipping. Afterward, the plant will bloom and it could be of any colored flower.

Portulaca flowers are truly beautiful in various garden and landscape settings and have been used to beautify old structures and stone walkways.

Portulaca is another clue to the wonderful drought tolerance of a perennial succulent flowering plant. Many varieties of portulaca have semi-double to fully double flowers that resemble miniature roses. Flowers bloom in bright colors, like yellow, orange, red, and bright pink, white, cream, and variegated flower colors are also available.

Common name(s): Eleven O Clock, Purslane, and Sun Plant

Flower colours: Any color

Bloom time: Summer season

Max reachable height: Up to 30-40 cm tall, spread up to 1 foot.

Difficulty to grow: Easy to grow

Planting and care

Portulacas love it hot and dry. You can plant them in poor, even sandy, soil. They also adapt to average garden conditions. Just give them full sun and any well-drained soil. Water them after planting and watch them go.

Propagation of portulaca is seeds and cutting. Best season of planting is early monsoon and spring season.

Sunlight: Full sunlight

Soil: Sandy well-drained soils.

Water: Moderately

Temperature: 20 to 30 degree C

Fertilizer: Apply any organic fertilizer.

Caring for Portulaca

- Water a plant when the soil feels dry to touch. Water thoroughly in the summer and reduce watering for the winter & rainy season.
- Try to water the plants in the morning around 8-10am.
- You should remove dead, infected, or damaged plant parts and throw in the garbage collector.
- You should prune and fertilize a plant mostly in the spring season.
- When a plant grows beyond its limit and pot size not providing enough space for the spread of roots, re-pot with fresh soil and some fertilizer.
- While re-potting, try not to disturb the roots. Avoid any drastic change in the provided environment otherwise, the plants may get stress/shock.
- For any insect attack or disease, you can use Neem oil, Eucalyptus oil or Citrus oil spray for primary treatment.

Typical uses of Portulaca

Special features: Beautiful, bright colored flower

Ornamental use: Portulaca is used as the ornamental plant.
