Description Asplenium scolopendrium, known as hart s-tongue or hart s-tongue fern is a fern in the genus Asplenium, of the Northern Hemisphere.

**Common name:** hart s tongue fern

**Color:** green

**Bloom time:** Non-flowering

**Height:** 1.00 to 1.50 feet

**Difficulty level:** easy to grow

**Planting & Care**

The plant will catch and reflect even the weakest rays of winter sunlight, adding a sparkle to the most bleak of winter gardens. At this time of year when very little grows in the cold, dank and north-facing areas of the garden A. scolopendrium will thrive. These are the conditions it enjoys in the wild throughout Britain.

**Sunlight:** Full Sun

**Soil:** well-drained soil

**Water:** medium

**Temperature:** 10°C (50°F)

**Fertilizer:** Apply any organic fertilizer

**Care:**

- A.
- scolopendrium is popularly known as the Hart s Tongue Fern.
- The resemblance to the plant must be striking because even in France it has the same common name, Langue de Cerf.

**Special Feature:**

Woodland gardens and shade gardens. Good selection for shady areas of limestone rock gardens.

Use

**Culinary use:**

- leaves

**Ornamental use:**

- The plant is used for ornamental purpose.

**Note:**

No serious insect or disease problems. Root rot can be a problem in poorly drained soils.
