Fertilizer: Apply any organic fertilizer

Caring for Sankrant Vel

- Water a plant when the soil feels dry to touch. Water thoroughly in the summer and reduce watering for the winter & rainy season.
- Try to water the plants in the morning around 8-10am.
- You should remove dead, infected or damaged plant parts and throw in the garbage collector.
- You should prune and fertilize a plant mostly in the spring season.
- When a plant grows beyond its limit and pot size not providing enough space for the spread of roots, re-pot with fresh soil and some fertilizer.
- While re-potting, try not to disturb the roots. Avoid any drastic change in the provided environment otherwise, the plants may get stress/shock.

- For any insect attack or disease, you can use Neem oil, Eucalyptus oil or Citrus oil spray for primary treatment.

Typical uses of Sankrant Vel

Special features: Attractive flowering

Ornamental use: The plant is used for an ornamental purpose.
