Thunbergia Erecta Nana, Meyenia Erecta Nana, Bush Clock Vine (Blue) Plant

Description for Thunbergia Erecta Nana, Meyenia Erecta Nana, Bush Clock Vine (Blue)

Plant height: 14 - 23 inches (35 - 59 cm)

Plant spread: 3 - 5 inches (7 - 13 cm)

The shoots are quadrangular and each angle bears a narrow wing. Leaves are ovate-elliptic, and oppositely arranged. Leaf margin is entire or wavy or occasionally with a broad triangular tooth above the middle.

Common name(s): Kings-mantle, Bush Clock Vine

Flower colours: Dark purple

Bloom time: Colder season.

Max reachable height: 4 to 6 feet.

Difficulty to grow: Easy to grow

Planting and care

Sky vine (*Thunbergia grandiflora*), also commonly referred to as clock vine, a member of the tropical Acanthaceae family and is an evergreen in frost free climates, where it also produces fruits, but growth slows or stops in cool temperatures. It is hardy in Zones 8-11.

The clusters of its trumpet flowers will enrich your garden with the vibrant feel from India, its origin. Dramatic lavender-blue flowers on a backdrop of dark green heart-shaped leaves will light up your garden all summer, or all year long in tropical climates.

Sunlight: Full Sun to Partial Shade

Soil: Well-drained soil

Water: Medium

Temperature: 50 degrees F.

Fertilizer: Apply any organic fertilizer

Caring for Thunbergia Erecta Nana

This vigorous vine grows in full sun, with a southern exposure, but stays greener and prettier with a little shade protection from the blazing afternoon sunshine, especially in warmer climates. Water the plant when the soil is dry, and fertilize in spring and fall with a granular fertilizer.

Prune after the blooming cycle is over to encourage a quick re-sprout, and prune again in late summer. When winter comes close, mulch the roots with pine needles or other organic material.

Typical uses of Thunbergia Erecta Nana

Special features:

Culinary use: Flowers

Ornamental use: The plant is used for ornamental purpose.
