Description

This is the palm which produces to popular betel-nut or supari, which is an essential ingredient of paan. It is a medium-sized tree growing to 20 m tall, with a trunk 20-30 cm in diameter. The leaves are 1.5-2 m long, pinnate, with numerous, crowded leaflets. It is grown for its economically important seed crop, the Betel nut.

Common name: Areca-nut palm

Color: Green

Bloom time: summer mid

Height: 20 m

Difficulty level: easy to grow

Planting & Care

The deep planting encourages the developing stem to send out roots to help stabilize the plant and perhaps eliminate the need for staking. Also, deep planting keeps lily bulbs cool when temperatures soar.

Sunlight: Full Sun to Partial Shade

Soil: well-drained soil

Water: Medium

Temperature: 14-36 deg.

Fertilizer: Apply any organic fertilizer

Care:

- Growing plants can be inexpensive, particularly when growing them from seed.

- Seeds of plants flowers should usually be sown directly into the sunny flower bed, as developing roots do not like to be disturbed.

Care:

- Apply a high-potassium liquid fertilizer every 2 weeks from early spring until 6 weeks after flowering.
- Keep moist in winter.

Special Feature:

The leaves are used to season meat and other foods in Caribbean, Latin American and Asian cuisines. It is often added to chutneys, a sauce containing fruits or vegetables that is eaten with other dishes.

Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

Caterpillars, mealybugs, and spider mites also cause problems. Avoid spraying and tolerate some leaf damage unless the situation is uncontrolled.
