Caring for Ornamental Orange

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

Sunlight

- Keep the plant outdoor in natural bright light.
- Protect the plant from direct harsh sunlight as it can cause damage to the foliage.

Soil

- The soil should be well drained and fertile rich in organic content.

Watering

- Poke your finger/plain small stick into the soil to check the moisture.
- Water when top soil (1-2 inches) feels dry to touch.
- Water thoroughly in the summer and reduce watering in winter and rainy season.

Application of Fertilizer

- During the main growing season feed the plant with organic fertilizer once a month.
- Loosen the topsoil without disturbing the roots of the plant so it can uptake the nutrients and moisture easily.

Re-potting

- When a plant outgrows in current pot, re-pot with fresh potting soil and some fertilizer.
- Do the re-potting late evening and keep the plant in shady area for 2 to 3 days and then move the plant in its suitable climatic condition.
