01

5 inch (13 cm) Grower Round Plastic Pot (Black)

---

**Description for Chlorophytum, Spider Plant**

**Plant height:** 5 - 9 inches (12 - 23 cm)

**Plant spread:** 4 - 8 inches (10 - 21 cm)

The spider plant is considered one of the most adaptable of houseplants and the easiest to grow. The spider plant is so named because of its spider-like plants, or spiderettes, which dangle down from the mother plant like spiders on a web. Available in green or variegated varieties, these spiderettes often start out as small white flowers. Spider Plant is also a champion cleanser of air. The NASA tests showed it to remove around 90% of the harmful chemical formaldehyde from the air. Since formaldehyde is found in common household products like adhesives, grout and fillers, itâ€™s a good idea to keep one of these plants around your kitchen and bathrooms especially.

**Common name(s):** Spider plant, Chlorophytum comosum, Ribbon Plant, airplane plant.

**Flower colours:** Greenish-white, white.

**Bloom time:** Rarely bloom.

**Max reachable height:** Up to 60 centimeters.

**Difficulty to grow:** Easy to grow.
Planting and care

Initial care for 1-2 weeks after receiving plant at your location:
- Keep the plant in natural indirect bright light.
- Poke your finger/plain small stick into the soil to check the moisture.
- Water when top soil (1-2 inches) feels dry to touch.
- Do not re-pot for min. 2 weeks after receiving it.

Key requirements to keep plant healthy:

**Sunlight:** natural bright light/indirect bright light.

**Soil:** Soil should be well drain and fertile, rich in organic content.

**Water:** Poke your finger/plain small stick into the soil to check the moisture. Water when topsoil (1-2 inches) feels dry to touch. Water thoroughly in the summer and reduce watering in winter and rainy season.

**Temperature:** 18-32 degrees Celsius.

**Fertilizer:** Apply any organic fertilizer.

Caring for Chlorophytum

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

**Sunlight**
- Keep the plant indoor with natural bright light/indirect bright light.
- Rotate the plant from direct harsh sunlight as it can cause damage to the foliage.
- Poke your finger/plain small stick into the soil to check the moisture.
- Water when top soil (3-4 inches) feels dry to touch.

**Application of Fertilizer**
- Summer and reduce watering in winter and rainy season.
- During the main growing season feed the plant with organic fertilizer once a month.
- Re-potting to keep the plant in shady area for 2 to 3 days and then move the plant in its suitable climatic condition.

**Plant Protection**
- Remove dead, infected or damaged plant parts and dispose them away from the planting area.
- Spray Neem, Eucalyptus or Citrus oil for any insect/pest attack, as a primary treatment.

**Don'ts**
- Easily grows in AC rooms but away from AC vents.
- Do not over-water the plant especially when pot does not have drainage holes.

Typical uses of Chlorophytum

**Special features:** Excellent air purifier plant according to NASA

**Ornamental use:** Best as potted plant and in hanging basket.
