Zephyranthes Grandiflora, Rain Lily (Any Color) Plant

01

5 inch (13 cm) Grower Round Plastic Pot (Black)

### Description for Zephyranthes Grandiflora, Rain Lily (Any Color)

**Plant height:** 5 - 9 inches (12 - 23 cm)

**Plant spread:** 4 - 6 inches (10 - 16 cm)

This product does not have the flowers at the time of shipping. Afterward, the plant will bloom and it could be of any colored flower.

Pink, yellow and white crocus-like flowers bloom from late spring through late summer, sometimes earlier during rainy seasons. Multiple flowers bloom on each stem.

Zephyranthes Grandiflora is a wonderful rain lily with 8" long, flat, glossy green foliage that quickly forms a nice 1 wide clump. All summer, clumps of Zephyranthes Grandiflora are topped with 12" tall stalks of giant, libido-awakening, 3" rose-pink flowers.

A clump can have up to 20 flowers open at once...absolutely spectacular. Zephyranthes grandiflora can be even more of a shocker when used in a mass planting...nothing demure or quaint here!

**Common name(s):** rose pink zephyr lily, pink rain lily.

**Flower colours:** white, pink, yellow.

**Bloom time:** Mid to late summer.

**Max reachable height:** Up to 30 centimeters.

**Difficulty to grow:** Easy to grow.

## Planting and care

Several of the zephyr lilies (genus Zephyranthes) are called "rain lily", but this one most deserves that name: Zephyranthes grandiflora blooms numerous times throughout the summer and autumn, always after a rain that follows a dry period.

**Sunlight:** Natural bright light/indirect bright light.

**Soil:** well-drained soils

**Water:** Poke your finger/plain small stick into the soil to check the moisture. Water when topsoil (1-2 inches) feels dry to touch. Water thoroughly in the summer and reduce watering in winter and rainy season.

**Temperature:** 20 to 30-degree celsius.

**Fertilizer:** Apply any organic fertilizer.

## Caring for Zephyranthes Grandiflora

Refer our [Garden Guide](#) for detailed procedures and meanings of words related to gardening.

### Sunlight

- **Soil** least five to six hours of sunlight a day is ideal for flowering and plant grow well in Natural bright light .
- **Watering** should be well drained and rich in organic content for growing Hibiscus plant.
- Water the plant when the top soil (1-2 inch) in pot feels dry to touch.
- Do not overwater the plant.
- **Application of Fertilizer** summer and reduce watering in winter and rainy season.
- During the main growing season feed the plant with organic fertilizer once a month.
- **Plant Protection** soil without disturbing the roots of the plant so it can uptake the nutrients and moisture easily.
- Remove dead, infected or damaged plant parts and discard them away from the plants.
- For any insect attack or disease, you can use Neem oil, Eucalyptus oil or Citrus oil spray for primary treatment.

### Don'ts

- Do not over water the plant.
- Avoid applying water on flowers and leaves it may cause fungus infection.

## Typical uses of Zephyranthes Grandiflora

**Special features:** There are some 70 species of zephyr lilies, all from the New World tropics and subtropics. Zephyranthes grandiflora is sometimes marketed in the bulb trade under incorrect names, such as the Cuban Z.

**Ornamental use:** Borders, rock gardens, along paths or sidewalks. Containers for patios, porches or decks. Houseplant.

**Medicinal use:**
