Description Acacia auriculiformis, commonly known as auri, earleaf acacia, earpod wattle, northern black wattle, Papuan wattle, and tan wattle, akashmoni in Bengali, is a fast-growing, crooked, gnarly tree in the family Fabaceae. It is native to Australia, Indonesia, and Papua New Guinea. It grows up to 30m tall. Acacia auriculiformis has about 47 000 seeds/kg

Common name: Acacia auriculiformis

Color: Yellow

Bloom time: May, June, July

Height: plant height will be 0.5 to 3ft.

Difficulty level: easy to grow

Planting & Care

Growing plants can be inexpensive, particularly when growing them from seed. Seeds of plants flowers should usually be sown directly into the sunny flower bed, as developing roots do not like to be disturbed.

Sunlight: Full Sun to Partial Shade

Soil: well-drained soil

Temperature: 40 F° (4.4 C°)

Fertilizer: Apply any organic fertilizer

Care:

- Deadhead to prolong flowering.
- Maintain moderate soil moisture and fertilize lightly.
- Zinnias will die with the first frost.

Special Feature:

This plant is raised as an ornamental plant, as a shade tree and it is also raised on plantations for fuelwood throughout southeast Asia, Oceania and in Sudan. Its wood is good for making paper, furniture and tools. It contains tannin useful in animal hide tanning. In India, its wood and charcoal are widely used for fuel. Gum from the tree is sold commercially, but it is said not to be as useful as gum arabic.

Use

Ornamental use:

- The plant is used for ornamental purpose.
-

Note:

pets & disease
