Aesculus hippocastanum Plant

Description for Aesculus hippocastanum

Plant height: 3 - 6 inches

Plant spread:

Aesculus hippocastanum, commonly called horsechestnut, is native to the Balkans. It is a medium to large deciduous tree that typically grows 50-75â€™ tall with an upright oval-rounded crown. Light green palmate compound leaves emerge in spring, each with 7 (less frequently 5) spreading ovate-oblong leaflets to 4-10â€• long.

Common name(s): horse chestnut

Flower colours: red or yellow

Bloom time: May

Max reachable height: 50.00 to 75.00 feet

Difficulty to grow: easy to grow

Planting and care

Easily grown in average, medium, well-drained soils in full sun to part shade. Prefers moist, fertile soils. Foliage tends to scorch and generally depreciate in dry conditions. This is a taprooted tree that once established is very difficult to transplant.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 4Â°C

Fertilizer: Apply any organic fertilizer

Caring for Aesculus hippocastanum

Once roots begin sprouting, plant them in pots of composted soil. Horse chestnut seedlings can be planted in their permanent locations the following spring or fall, or whenever they reach about a foot or so tall.

Typical uses of Aesculus hippocastanum

Special features: It has been widely planted in the midwest as a street and shade tree.

Ornamental use: The plant is used for ornamental purpose. Its generally kep indoor in living room and in terrac area.
