Description

### Description for Aframomum Melegueta, Grains Of Paradise

Aframomum melegueta is a species in the ginger family, Zingiberaceae. This spice, commonly known as ossame, grains of paradise, Melegueta pepper, alligator pepper, Guinea grains, fom wisa, or Guinea

Common name	Flower colours	Bloom time	Height	Difficulty
Alligator pepper, atar, graines de paradis, grains of paradise, grana	White	July to August	1.00 to 2.50 feet	easy to grow

### Planting and care

The vining varieties require a support structure as some can get 15 feet tall. All plants prefer sun to light shade sites with well-draining and moderately fertile soil. Install the plant in the ground at the same level it was growing in the nursery pot.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	well-drained soil	Dry to medium	1Å°C	Apply any organic fertilizer

### Caring for Aframomum Melegueta

plants do best with 90 inches of rain per year, so unless you live in a rain forest, water regularly. plants love water but don't drown them. That is, they don't like to sit in water, and they'll die if the soil is too wet in winter. The ideal soil is rich and loose, with good drainage.

## Typical uses of Aframomum Melegueta

**Special features:** Culinary herb for herb gardens. Also effective as an ornamental in window boxes, hanging baskets or containers.

**Ornamental use:** The plant is used for ornamental purpose.

**Medicinal use:** The people of Manang district, central Nepals, take the juice of the plant, believing it purifies the blood. Pounded leaves are boiled in water and spread on cots, beds, and mats to kill bugs.
