Description

### Description for Agarwood, Oud, Oodh

Agarwood, also known as oud, oodh, agar, aloeswood or lign-aloes, is a dark resinous heartwood that forms in Aquilaria and Gyrinops[1] trees (large evergreens native to southeast Asia) when they become infected with a type of mould. Prior to infection, the heartwood is odourless.

Common name	Flower colours	Bloom time	Height	Difficulty
Aquilaria agallocha	yellowish-green	Spring Time	131.23 ft	easy to grow

### Planting and care

Growing plants can be inexpensive, particularly when growing them from seed. Seeds of plants flowers should usually be sown directly into the sunny flower bed, as developing roots do not like to be disturbed.

Sunlight	Soil	Water	Temperature	Fertilizer
Partial Shade	well-drained soil	Medium
