Air Plant, Tillandsia pseudobelayi Plant

Description for Air Plant, Tillandsia pseudobelayi

Plant height: 3 - 5 inches

Plant spread: 1 - 3 inches

Tillandsia is either epiphytic (tree-dwelling) or lithophytic (rock-dwelling). In general, they have alternating stiff or leathery strap-shaped leaves. Leaves color varies from silver to shades of green blushed with other bright colors. Leave texture is soft.

Common name(s): Air plant

Flower colours: Not defined

Bloom time: Not defined

Max reachable height: Up to 20 cm

Difficulty to grow: Easy to grow

Planting and care

Air plants attach themselves to rocks, trees, shrubs, or the ground with their roots. Tillandsias are not requiring any soil or such planting medium. Shells, the piece of bark, or any other object should be used for the mounting the air plant. It can absorb the moisture and nutrient from the air.

Sunlight: Partial sunlight, Partial shade

Soil: Not required

Water: Average water

Temperature: 20 to 30 degree C

Fertilizer: Spray organic fertilizer.

Caring for Air Plant

- They can survive with water misting and the occasional bath.
- Provided the atmosphere should not too dry.
- Use a soaking mist once or twice a week in summer and once a fortnight in cooler weather.
- Keep in bright indirect sunlight.
- Need (at minimum) to submerge the plant in water for 2-3 hours about every two weeks.
- Spray the fertilizer on the whole plant.

Typical uses of Air Plant

Special features: Air Plants get the majority of their nutrients from the air.
