Description

Description for Ajwain Leaves

Ajwain leaf, also known as bishop s weed, is a tender, fleshy leaf with an oregano or thyme like flavor and aroma. The plant, a native to India and East Asia, has many medicinal properties and the leaves are used extensively in cooking throughout India. Read on for more ajwain leaf benefits

Common name	Flower colours	Bloom time	Height	Difficulty
Ajwain, ajowan Trachyspermum ammi, Ajowan caraway, bishop s weed or carom	Green	Flowers in mid- to late summer.	2 to 3 feet	Easy to grow

Planting and care

The ajwain plant is very easy to grow and is equally good to look at. You could grow it as a hedge in a small garden as it is quite prolific and fills up really fast, but be careful as it can overrun other plants. Most people will not be able to differentiate the ajwain plant from other ornamentals in a garden, so you can actually use it as an ornamental foliage plant and in your food.

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun to Partial Shade	Well-drained soil	Medium	15 to 25 degrees C.	Organic

Caring for Ajwain Leaves

The ajwain plant is very easy to grow and is equally good to look at. You could grow it as a hedge in a small garden as it is quite prolific

and fills up really fast, but be careful as it can overrun other plants. Most people will not be able to differentiate the ajwain plant from other ornamentals in a garden, so you can actually use it as an ornamental foliage plant and in your food.
