Description

Description for Allamanda Creeper (Yellow)

As shrub Allamanda grows very thick and get covered with yellow bell shaped 3 to 4 inches long blooms in growing season. Although it does not have tendrils to climb but provided support can grow as vine too.

Common name	Flower colours	Bloom time	Height	Difficulty
Golden trumpet vine	Yellow	Spring, Summer, Fall, Winter	4 to 6 ft	Easy

Planting and care

Allamanda is a bushy nature plant, large sized container is preferable as the plant gets heavy with the time. You may need to repot it every year. Regardless of size, make sure container has drainage holes at bottom to ensure smooth drainage of water. Put stone or brick pieces on the holes.

Sunlight
Full sun

Soil
Soil pH 7.6 to 7.8 (mildly alkaline), Any good-quality potting mix.

Water
Requires consistently moist soil. Do not let dry out between waterings.

Temperature
Average to warm temperatures 65-80 degrees F/18-27 degrees C.
Allamanda plant is frost-tender. Actually, it does not like the cold at all. It will tolerate a minimum of 60 degrees F/16 degrees C in winter.

Fertilizer
Feed the plant with liquid fertilizer in growing season and cut it down to once a month in winter.

Caring for Allamanda Creeper

- Allamanda grows very rapidly and needs pruning due to its bushy nature. Also pruning increases air circulation in plant required for good growth.
