---	---------------------------	---	-------------------	---------------------

Planting and care

Allamanda is a bushy nature plant, the large sized container is preferable as the plant gets heavy with the time. You may need to repot it every year. Regardless of size, make sure container has drainage holes at the bottom to ensure smooth drainage of water. Put stone or brick pieces on the holes.

Sunlight Full sun to Partial shade.	Soil Soil pH 7.6 to 7.8 (mildly alkaline).	Water Requires consistently moist soil. Do not let dry out between waterings.	Temperature Below 25 degrees C	Fertilizer Feed the plant with liquid fertilizer in growing season and cut it down to once a month in winter.
--	--	--	-----------------------------------	---

Caring for Allamanda Tiger

Allamanda grows very rapidly and needs pruning due to its bushy nature. Also pruning increases air circulation in plant required for good growth.

Typical uses of Allamanda Tiger

Special features:

Medicinal use: Allamanda species have been used in systems of traditional medicine for various purposes. A. cathartica has been used to treat liver tumors, jaundice, splenomegaly, and malaria. In analyses, some species have shown some activity against carcinoma cells, pathogenic fungi, and HIV.
