Description

Description for Amaryllis Lily Double (Mix Colors)

These plants are perennial herbaceous bulbous plants. They generally have large fleshy bulbs and tall broad leaves, generally evergreen. The foliage is evergreen in warm climates and will continue to grow. flower stalks will develop in the fall.

Common name	Flower colours	Bloom time	Height	Difficulty
Amaryllis	Varies	Spring	Up to 60 cm	Easy to grow

Planting and care

Amaryllis may be planted from September through April in warm weather climates. If planting in a pot then, choose a high-quality pot as bulbs grow big. Dig holes and plant the bulbs with an inch of the bulb above the soil surface. Keep at least 3 inches of distance between each bulb.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun to light shade	Well-drained	Medium	18 to 24 degrees C	Use any organic fertilizer.

Caring for Amaryllis Lily Double

- After planting, water well. Reduce watering in the winter.
- Apply mulch in the fall.
- Remove the mulch in the spring to prevent excess moisture from affecting the bulb.
- Cut off the old flower stalks after flowering but leave the foliage in place.
- Re-pot your bulb in the fresh potting soil.

Harvesting

Spring, After Spring
