Description

Description for Amazon Lily, Eucharis Lily

Eucharis is a perennial with a bulb 2 to 6 cm in diameter. The stalked leaves are 20 to 55 cm long and 10 to 20 cm broad. Flowers are large, sweet-scented.

Common name	Flower colours	Bloom time	Height	Difficulty
Amazon Lily, Eucharis Lily	White	Winter, Summer, More often in spring	Up to 2 feet	Easy to grow

Planting and care

It likes shade and sheltered areas and makes an excellent potted plant. It can be planted in the garden. Plant them with their necks slightly above the soil surface. Plant in a normal potting compost and plant at 3 to 4 cm. Propagations by offsets can be done in the spring.

Sunlight	Soil	Water	Temperature	Fertilizer
Bright light, partial shade	Sandy loam soil, well-drained soil	Medium	15 to 30 degrees C	Use any organic fertilizer

Caring for Amazon Lily

- Do not spray water on the open flowers.
- Water the newly potted bulb sparingly until new growth begins.
- Feed monthly in spring and summer with a high-phosphorous liquid fertilizer.
- Re-potting can be done in the summer.

- After flowering, reduce the rate of watering.

Harvesting

Spring (Flower & Bulb)
