Description

Description for Anogeissus Acuminata

Anogeissus is a genus of trees in the family Combretaceae. The 10 to 12 species are distributed in Asia and tropical Africa. These are trees and shrubs with tubular flowers that lack petals and dry fruits with ridges or wings

Common name	Flower colours	Bloom time	Height	Difficulty
Buttontree	Yellowish green	June-September.	15-18 meters,	Easy to grow

Planting and care

Anogeissus is a genus of trees native to South Asia, the Arabian Peninsula, and Africa. Buttontree is a moderate sized tree with small leaves, which fall early in the dry season. Before falling the foliage of these trees turns a beautiful yellowish red. The leafy branches are pendulous and hang down gracefully. Leaves upto 3 cm appear in nearly opposite pairs.

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun to Partial Shade	Well-drained soil	Medium	44 deg C.	Apply any organic fertilizer
