Description

Description for Antirrhinum, Snapdragons (Peach)

Snapdragons are a particular favourite of children who like to pinch the tiny individual blossoms and make the "dragon mouth" open and close. Their large, blossom-laden flower heads are faintly fragrant and come in in a wide assortment of bright colours.

The vertical flower spikes, opening gradually from the bottom to the top, are available in two heights: dwarf varieties grow to about 10 inches while the taller types grow to a height of 18-24 inches.

A variety that grows up to 5 feet has been developed, but it must be staked. A single snapdragon plant may produce seven or eight blossom spikes in the course of a summer.

Common name Antirrhinum, snapdragon, Dog's Mouth, Lion's Mouth, Toad's Mouth , dog flower.	Flower colours it comes in many colors like Maroon, purple plus bicolor, white, red, yellow, pink, peach	Bloom time April to frost	Height Height: 1.00 to 3.00 feet Spread: 0.50 to 1.00 feet	Difficulty Easy
---	---	------------------------------	--	--------------------

Planting and care

It is usually grown as an annual. It is easily grown in moist, organically rich, well-drained soils in full sun. Avoid overhead watering. Start seeds indoors 6-10 weeks before last frost date or purchase starter plants. Set out plants/seedlings after last frost date.

Pinch stem tips of young plants to promote bushiness and prevent leggy growth. Deadhead spent flowers to prolong bloom. If flowering slows drastically after the first flush of bloom, consider cutting plants back hard and fertilizing. Snapdragons are inexpensive plants that are perhaps best repurchased each spring.

Sunlight
Full sun

Soil
They will grow well in
average soil. Soil should be
well draining.

Water
Medium

Temperature
32F to 65F

Fertilizer
Add a general purpose
fertilizer before planting if
the soil is poor. After the
flowers have died off, cut the
plant back to about six
inches. Then add some
general purpose fertilizer.
This will promote new
growth and a second bloom.

Caring for Antirrhinum

- If insect or disease problems occur, treat early with organic or chemical insect repellents and fungicide.
- Snapdragons are very hardy. They can withstand a heavy frost.
- So, if your plant is still blooming in the fall, do not be too quick to clean up the flower garden.

Typical uses of Antirrhinum

Special features: deer resistant non-aggressive non-invasive fragrant

Ornamental use: Snapdragons produce multiple flowers on stalks and can range in height from 8 inches to greater than 3 feet. They bloom profusely and come in many colours, mainly in pastel and bright shades, including white, pink, yellow, peach, orange, purple, bronze and two-tone flowers.
