Aralia Green Plant

01

5 inch Grower Round Plastic Pot (Black)

Description for Aralia Green

Plant height: 3 - 5 inches

Plant spread: 4 - 6 inches

The distinct leaves of an aralia plant can be lacy, rounded, or spinach shaped. The colour of the leaves is green, white, gold, and cream. The trunks of specimen aralia plants- thick, woody, and curving, are often unique and exotic appearance.

Common name(s): Aralia Green, Polyscias, Geranium aralia

Flower colours: whitish or greenish

Bloom time: Ornamental varieties hardly bloom.

Max reachable height: 7 to 12 feet

Difficulty to grow: Easy to grow

Planting and care

Aralia plants can propagate by stem cuttings or if the stems are thick enough, air layering during the rainy season. Propagating aralia plants is more successful when temperatures are above 21 degrees C.

Sunlight: Partial or indirect sunlight

Soil: Peat-based, well-aerated, light soil

Water: Medium

Temperature: 20 to 30 degree C

Fertilizer: Fertilize every two weeks with liquid house plant fertilizer in spring and summer and monthly in fall and winter.

Caring for Aralia Green

- Adequate watering is of course, essential, but over-watering is above all the greatest cause of the demise of virtually all Aralias.
- It is generally thought that plants will thrive when kept on the dry side.
- False aralia does not like to be moved. A sudden change in location causes the leaves to drop off.
- Trimming the tips of an Aralia Plant helps promote new growth.
- Handpick as many of the mealybugs from the plant as possible.
- Treat the areas near the base of the leaves with a cotton swab dipped in alcohol every five days, especially where you see the cottony masses of insects.
- Insecticidal soap is helpful when mealybugs are in the crawling stage before they attach to the foliage and assume their cottony appearance.

Harvesting

NA
