Description

Description for Aristolochia reticulata

Aristolochia reticulata is a PERENNIAL growing to 0.4 m (1ft 4in). It is in flower from May to July. The flowers are hermaphrodite (have both male and female organs) and are pollinated by Flies. Suitable for: medium (loamy) soils and prefers well-drained soil. Suitable pH: acid, neutral and basic (alkaline) soils. It can grow in semi-shade (light woodland) or no shade. It prefers moist soil.

Common name	Flower colours	Bloom time	Height	Difficulty
Indian Root, Virginia Snakeroot, Arizona Snakeroot, Texas Dutchmans Pipe	purplish or yellow-green flowers	May to July	0.4 m	easy to grow

Planting and care

Prefers a well-drained loamy soil, rich in organic matter, in sun or semi-shade. Succeeds in ordinary garden soil

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun to Partial Shade	well-drained soil	Medium	-	Apply any organic fertilizer

Caring for Aristolochia reticulata

- Prune / thin out every 1-3 years.

Typical uses of Aristolochia reticulata

Special features: one frequently sees Dutchman s pipe vines growing up the front of a porch on older homes, in which role they cast welcome shade during summer s scorching reign (while simultaneously furnishing some privacy).

Ornamental use: used for ornamental purpose.

Medicinal use: The root is aromatic, bitter, diaphoretic, stimulant and stomachic. The dried rhizome of Aristolochia reticulata is sometimes sold as serperntary for the treatment of snakebites. It is used as a tonic to calm the stomach, promote urination, and increase perspiration.
