Description

Description for Avocado, Butter Fruit, Makhanphal (Grown through seeds)

The avocado (*Persea americana*) is a tree that is native to South Central Mexico, classified as a member of the flowering plant family Lauraceae. Avocado (also alligator pear) additionally refers to the tree's fruit, which is ... It is known as "butter fruit" in parts of India and goes by the name

Common name	Flower colours	Bloom time	Height	Difficulty
<i>Persea americana</i> ,Avocado, Butter Fruit Plant, <i>Persea americana</i> ,Makhanphal	Brown	July through August	1.5 to 2 feet	Easy to grow

Planting and care

An accurate soil test will tell you where your pH currently stands. Acidic (sour) soil is counteracted by applying finely ground limestone, and alkaline (sweet) soil is treated with ground sulfur.

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun	well-drained soil	Medium	20 to 30 degrees C	Apply any organic fertilizer

Caring for Avocado

- Prune plant every spring and destroy all old or diseased plant material.
- Wear elbow-length gloves that are thick enough to protect your hands from thorns or a clumsy slip, but flexible enough to allow you to hold your tools.
- Always wear safety goggles; branches can whip back when released.

Typical uses of Avocado

Special features: That is why most people in Bangalore call the avocado "butter fruit" ... and exotic flowering trees; we have forgotten how to grow the avocado.
