Description

Description for Bougainvillea (Orange)

Bougainvillea plants need support to cover a wall, fence, or other area. Create rows of wire or string against the surface that you want covered. Tuck the bougainvillea branches behind these guidance supports at regular intervals. Keep a close eye on growth and adjust as necessary until the bougainvillea starts covering the wall or other surface.

Bougainvillea plants are a beloved addition to many gardens and walls. Bougainvillea is a vine-like, thorny shrub that grows rampantly. It can be trained to climb trellises or be planted as an attractive but thornily impenetrable barrier, and it can also serve as a groundcover. Bougainvilleas have beautiful, brightly colored bracts, which are specialized leaves that contain the plant's flowers.

successful. keep containers moist but also they need to be well drained. No sitting plants in standing water. If growing in pots, DO NOT USE SAUCERS under your pots. A healthy container grown plant will drink a lot of water during the warm times of the year.

In cooler periods or when you bring your plants indoors for the winter, the water requirement will be much less.

phosphorus with micronutrients, as well as additional iron and magnesium Slow or timed release fertilizers are acceptable.

Caring for Bougainvillea

- Wait for the first colorful bracts to form and fall in spring.
- Once they fall, prune excess growth Fertilize.
- This will cause new bloom on the shorter flowering spurs.
- Repeat during the flowering season as needed.

Typical uses of Bougainvillea

Special features: Use for a lush tropical effect on arbors, trellises, and spilling over fences.

Ornamental use: The plant is used for ornamental purpose.
