Description

### Description for Bougainvillea Variegated (Pink & White Flower)

Bougainvillea plants need support to cover a wall, fence, or other area. Create rows of wire or string against the surface that you want covered. Tuck the bougainvillea branches behind these guidance supports at regular intervals. Keep a close eye on growth and adjust as necessary until the bougainvillea starts covering the wall or other surface.

Bougainvillea plants are a beloved addition to many gardens and walls. Bougainvillea is a vine-like, thorny shrub that grows rampantly. It can be trained to climb trellises or be planted as an attractive but thornily impenetrable barrier, and it can also serve as a groundcover. Bougainvilleas have beautiful, brightly colored bracts, which are specialized leaves that contain the plant's flowers.

Common name  
buganvilla

Flower colours  
Pink and white

Bloom time  
They are evergreen where rainfall occurs all year, or deciduous if there is a dry season.

Height  
They are thorny, woody vines growing anywhere from 1 to 12 m (3 to 40 ft.) tall

Difficulty  
Easy

### Planting and care

These tropical climbers are suitable for large containers placed in the garden during summer but must be kept frost-free in winter.

| Sunlight      | Soil  | Water   | Temperature   | Fertilizer  |
|---------------|---|---|---|---|
| Full Sunlight | They thrive in almost any soil as long as it is well-drained and fertile. Soils that work for other plants you grow will be fine. | Make sure you don't let the plants dry out between waterings. If you want to be successful, keep containers moist but also they need to be well drained. No sitting plants in standing water. If growing in pots, DO NOT USE SAUCERS under your pots. A healthy container grown plant will drink a lot of water during the warm times of the year. In cooler periods or when you bring your plants indoors for the winter, the water requirement will be much less. | Bougainvillea do best when night temperature don't drop below 60 °F (16 °C) and daytime temperatures don't exceed 100 °F (38 °C). | Mature plants can be heavy feeders. Here is some quick fertilizer tips. High phosphorus with micronutrients, as well as additional iron and magnesium Slow or timed release fertilizers are acceptable. Make sure you follow the fertilizer label Plants grow best with small amounts of nutrients constantly available Do not apply fertilizers to dry soil " Do not overfertilize " in this case less is better than more |

### Caring for Bougainvillea Variegated

Wait for the first colorful bracts to form and fall in spring Once they fall, prune excess growth Fertilize. This will cause new bloom on the shorter flowering spurs Repeat during the flowering season as needed.
