Description

Description for Bougainvillea Variegated (Pink and White Flower)

Bougainvillea plants need support to cover a wall, fence, or other area. Create rows of wire or string against the surface that you want covered. Tuck the bougainvillea branches behind these guidance supports at regular intervals. Keep a close eye on growth and adjust as necessary until the bougainvillea starts covering the wall or other surface.

Bougainvillea plants are a beloved addition to many gardens and walls Bougainvillea is a vine-like, thorny shrub that grows rampantly. It can be trained to climb trellises or be planted as an attractive but thornily impenetrable barrier, and it can also serve as a groundcover. Bougainvilleas have beautiful, brightly colored bracts, which are specialized leaves that contain the plant's flowers.

Don't expect your plants to flower indoors. If possible, keep your plants outdoors and give it the maximum sun exposure. Any flowering you may receive indoors is a bonus.

Common name
Bougainvillea are also known as buganvilla (Spain), bugambilia (Mexico), Napoleón (Honduras), veranera (Colombia, Nicaragua, El Salvador, Costa Rica and

Flower colours
Pink and white

Bloom time
They are evergreen where rainfall occurs all year, or deciduous if there is a dry season.

Height
They are thorny, woody vines growing anywhere from 1 to 12 m (3 to 40 ft.) tall

Difficulty
Easy

Panama), trinitaria (Colombia, Cuba, Panama, Puerto Rico, Dominican Republic & Venezuela), Santa Rita (Argentina, Bolivia, Brazil, Paraguay and Uruguay) or papelillo (northern Peru).

Planting and care

These tropical climbers are suitable for large containers placed in the garden during summer but must be kept frost-free in winter.

Sunlight	Soil	Water	Temperature	Fertilizer
For the best results put your plants in full sun. If you want good blooming give them at least 5 hours a day of full sunlight as a minimum. More hours of direct sun is better. Less than 5 hours and the plant may not bloom very well. Your plants will thrive in shade or partial shade, but only have nice growth with little or no blooms.	They thrive in almost any soil as long as it is well-drained and fertile. Soils that work for other plants you grow will be fine.	Make sure you don't let the plants dry out between waterings. If you want to be successful, keep containers moist but also they need to be well drained. No sitting plants in standing water. If growing in pots, DO NOT USE SAUCERS under your pots. A healthy container grown plant will drink a lot of water during the warm times of the year. In cooler periods or when you bring your plants indoors for the winter, the water requirement will be much less.	Bougainvilleas are hardy throughout the South but young growth will be damaged by frost. Optimum growing temperatures are warm days. A light frost will not kill the plant, but you can soon expect all the leaves and bracts to fall off. In this case, the plant will regrow if not subjected to more frosts for longer duration. Bougainvillea do best when night temperature dont drop below 60 F (16C) and daytime temperatures don't exceed 100F (38 C).	Mature plants can be heavy feeders. Here is some quick fertilizer tips. High phosphorus with additional iron and magnesium Slow or timed release fertilizers are acceptable. Make sure you follow the fertilizer label Plants grow best with small amounts of nutrients constantly available Do not apply fertilizers to dry soil, Do not overfertilize, in this case less is better than more

Caring for Bougainvillea Variegated

Wait for the first colorful bracts to form and fall in spring Once they fall, prune excess growth Fertilize. This will cause new bloom on the shorter flowering spurs Repeat during the flowering season as needed.

Typical uses of Bougainvillea Variegated

Special features: Train the bougainvillea: Bougainvillea plants need support to cover a wall, fence, or other area. Create rows of wire or string against the surface that you want covered. Tuck the bougainvillea branches behind these guidance supports at regular intervals. Keep a close eye on growth and adjust as necessary until the bougainvillea starts covering the wall or other surface.

Ornamental use: The plant is used for ornamental purpose.
