Description

Butea monosperma is a species of Butea native to tropical and sub-tropical parts of the Indian Subcontinent and Southeast Asia, ranging across India, Bangladesh, Nepal, Sri Lanka, Myanmar, Thailand.

Common name: Butea monosperma

Color: Orange/red

Bloom time: January to March

Height: 30.00 to 40.00 feet

Difficulty level: easy to grow

Planting & Care

After a good rain, find a spot that is the first to dry out. Water trapped beneath the scales may rot the bulb, so a well-drained site is essential. Also, select a site that gets full sun. For dependable blooms, lilies need six to eight hours of direct sunlight a day.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 30° C

Fertilizer: Apply any organic fertilizer

Care:

- The mulch should feel moist but not wet.
- Apply a high-potassium liquid fertilizer every 2 weeks from early spring until 6 weeks after flowering.
- Keep moist in winter.
- Apply a thin layer of compost each spring, followed by a 2-inch layer of mulch.
- Stake tall lilies.
- Lilies do not rebloom, but you can remove the faded flowers so that the plants seeds.

Special Feature:

Best planted as a specimen in a mixed grove of trees that will hide its awkward habit but give its flowers full visibility.

Use

Ornamental use:

- The plant is used for ornamental purpose.
- Its generally kep indoor in living room and in terrac area.

Note:

No serious insect or disease problems.
