Description Easily grown in average, dry to medium moisture, well-drained soils in full sun. Drought tolerant. Easily grown from seed, and will self-seed in the landscape if seed pods are not removed prior to splitting open.

Common name: antelope, prong-horned, *Antilocapra americana*

Color: Green

Bloom time: May to July

Height: 1.50 to 2.50 feet

Difficulty level: easy to grow

Planting & Care

plant care may require a bit of effort, but the results are well worth the work. Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance. Common is a vine and has larger glossy green leaves than Royal. Both can survive in temperate climates if they are planted in a sheltered area.

Sunlight: Full sun

Soil: well-drained soil

Water: Dry to medium

Temperature: 26o C and 28oC

Fertilizer: Apply any organic fertilizer

Care:

- Plants love water—but don't drown them.
- That is, they don't like to sit in water, and they'll die if the soil is too wet in winter.
- The ideal soil is rich and loose, with good drainage.
- One of the worst mistakes you can make is to not provide adequate drainage.

Special Feature:

Butterfly gardens, meadows, prairies, or naturalized/native plant areas. Borders.

Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

No serious insect or disease problems.
